2 Notes on using the cover page:

1. The cover page could be used as a complement to submitting detailed forms adopted at the Meetings of the States parties in instances when the information to be provided in some of the forms in an annual report is the same as in past reports. That is, when using the cover page, only forms within which there is new information would need to be submitted.
2. The cover page could be used as a substitute for submitting detailed forms adopted at the Meetings of the States parties only if all of the information to be provided in an annual report is the same as in past reports.
3. If an indication is made on the cover sheet that the information to be provided with respect to a particular form would be unchanged in relationship to a previous year's form, the date of submission of the previous form should be clearly indicated.
4. The cover page may be used for subsequent annual reports and is not to be used for the initial Article 7 report submission.

Form A National implementation measures

Article 7, paragraph 1

“Each State Party shall report to the Secretary-General ... on:

(a) **The national implementation measures referred to in article 9;”**

Remark: In accordance with article 9 “Each State Party shall take all appropriate legal, administrative and other measures to implement this Convention, including the imposition of penal sanctions, to prevent and suppress any activity prohibited to a State Party under this Convention undertaken by persons or on territory under its jurisdiction or control.”

State [Party]: DENMARK.....

Reporting for time period from 01/01/2012 to 31/12/2012.

<i>Legal, administrative and other measures taken to implement the CCM (including imposition of penal sanctions)</i>	<i>Supplementary information (e.g., text and effective date of implementation measures, including legislation, administrative measures, policies and directives, training of military forces)</i>
<ul style="list-style-type: none"> • The CCM has been translated into Danish and published in the Law Gazette. • A review of existing Danish legislation has proven it unnecessary for Denmark to take national legal measures to implement the CCM. • Defence Command Denmark has issued an implementation letter to subordinate commands stating the entry into force of the Convention. • The Danish government has issued a “Guide to Responsible Investment” 	<ul style="list-style-type: none"> • Implementation letter issued by Defence Command Denmark highlights the following: <ul style="list-style-type: none"> • Limitations on the possibilities to co-operate with nations who have not signed the convention. • Existing stockpiles of cluster munitions cannot be used in military operations and must be maintained in centralized depots separately from other types of ammunition to be used operationally. Likewise cluster munitions should be clearly marked as to be destroyed. • Existing stockpiles of munitions covered by the convention cannot be transferred to others unless specifically stipulated by the convention. Such transferrals can only cover limited amounts of munitions to be used for training purposes and should be thoroughly documented. • Nations will exchange an annual report on munitions stockpiled for training purposes. Furthermore no later than 180 days after entry into force of the convention nations will provide the UN with a report on certain aspects of cluster munitions. • In September 2011 the Danish government issued a “Guide to responsible investment” based on the UN-backed “Principles for Responsible Investment” (PRI). Although the Principles for Responsible Investment do not include specific references to international conventions, they are to be seen in connection with the ten principles of

	<p>the UN Global Compact. As such, responsible investment according to PRI and the Danish Guide to responsible investment would demand all investors to respect international norms and conventions including e.g. the CCM.</p> <ul style="list-style-type: none">• Defence Command Demark has in the course of 2012 consolidated a plan for the destruction of stockpiled cluster ammunition as well as identified possible ammunition to be retained for education and training of EOD personnel.
