## A- National Implementation Measures

### - Action #48 - Siem Reap-Angkor Action Plan

#### **Committed**

We would like to highlight that Iraq was mentioned in the Article 7 Report submitted in 2020 (the 12th Updated Information Report provided in accordance with Article 7, paragraph 2, of the Convention on the Prohibition of the Use, Stockpiling, Production, and Transfer of Anti-Personnel Mines and on Their Destruction).

**Iraq has fully complied with its obligations under Article 9 of the Convention.**

## B-Stockpiled anti-personnel mines:

### - Action #13 - Siem Reap-Angkor Action Plan

#### **Committed**

**According to Article 4**, the Republic of Iraq has no stockpiled anti-personnel mines. As previously reported, Iraq has completed the destruction of all anti-personnel mines it owned, possessed, or that were under its jurisdiction or control. There are no remaining stockpiled mines.

**Iraq has therefore fulfilled its obligations under Article 4 of the Convention.**

## C- Location of Mined Area and Improvised mines (IEDs)

### - Action #21 - Siem Reap-Angkor Action Plan

#### **C1-1: Location of Mined Area**

##### **C1-1-1 : DIRECTORATE FOR MINE ACTION (DMA)**

###### Newly Discovered Mined Areas in 2024

The table (1) below presents the newly discovered mined areas that were recorded in the database during the period from 1 January , 2024, to 31 December , 2024. These discoveries were made during updates to the Non-Technical Survey (NTS) and Technical Survey (TS). The newly locations had not been recorded previously in data base due to the unfavorable security conditions in those areas at that time. The total size of mined areas discovered in 2024 amounts to 138,077,956 square meters.

*Table 1- (DMA) Locations of mined Area, 1 January-31 December (2024)*

Map 1- (DMA) Recorded Landmine Contamination

## C1-2: Location of Improvised mines (IEDs)

### C1-2-1: DIRECTORATE OF MINE ACTION AUTHORITY (DMA)

The table (2) below presents areas affected by improvised explosive devices (Improvised mines (IEDs), as recorded in the IMSMA database during the period from 1 January, 2024, to 31 December, 2024. Most of these contaminated sites are located within the governorates covered by the Regional Mine Action Centre–North (RMAC-N) and were previously under the control of DAA'SH terrorist groups. The total area size of newly discovered Improvised mines (IEDs) - contaminated locations in 2024 amounts to 100,807,391 square meters.

Table 2-(DMA) List of Improvised (IEDs) locations, 1 January-31 December (2024)

## C2- Summary of all areas *known or Suspected* to contain Anti-Personnel mines and Improvised mines , as of 31 December (2024)

- Action #17 - Siem Reap-Angkor Action Plan

### **C2-1 : Summary of all areas known(CHA) or Suspected (SHA) to contain Anti-Personnel Mines**

#### **C2-1-1 : DIRECTORATE FOR MINE ACTION (DMA)**

As of 31 December, 2024, My country still to face significant challenges related to landmine contamination. Under the oversight of the Directorate of Mine Action (DMA), 450 areas remain either confirmed or suspected to be contaminated with anti-personnel mines. These areas collectively span over 1.103 billion square meters, posing a serious threat to public safety, infrastructure development, and the return of displaced populations.

#### **Breakdown of Contaminated Areas:**

##### **-Confirmed Hazardous Areas:**

A total of 409 areas have been identify Improvised mines (IEDs)as containing anti-personnel mines based on direct evidence, covering an estimated 1,024,619,079 square meters.

##### **-Suspected Hazardous Areas:**

An additional 41 areas are suspected to be contaminated based on indirect evidence, accounting for 79,263,677 square meters.

Together, these 450 areas are spread across 25 districts in 10 provinces under DMA authority, representing one of the most extensive landmine challenges in the world.

Bellow Summery of Areas known or Suspected to Contain Anti-Personnel Mines For a detailed breakdown of all contaminated and suspected areas, refer to Annex (2).

Table 3- (DMA) Summary of Areas known or Suspected to Contain Anti-Personnel Mines as of 31 December (2024)

- For More Information See Table 43- Annex (2) - List of DMA areas known or suspected to contain anti-personnel mines as of 31 December (2024)

## C2-1-2 : Iraq Kurdistan Mine Action Authority (IKMAA)

As known, the majority of the planted mines in KRI are Anti-person mines and when new areas discovered, it's perfectly normal that the new contaminated areas are APs, as it is the case now. Due to the IKMAA's ongoing PTS in the governorates of Slemani, the total areas that suspected to contain AP mines are decreased from to **208,391,051** sqm, as shown the CHA is increased, Improvised mines (IEDs) is not included as shown in the table below:

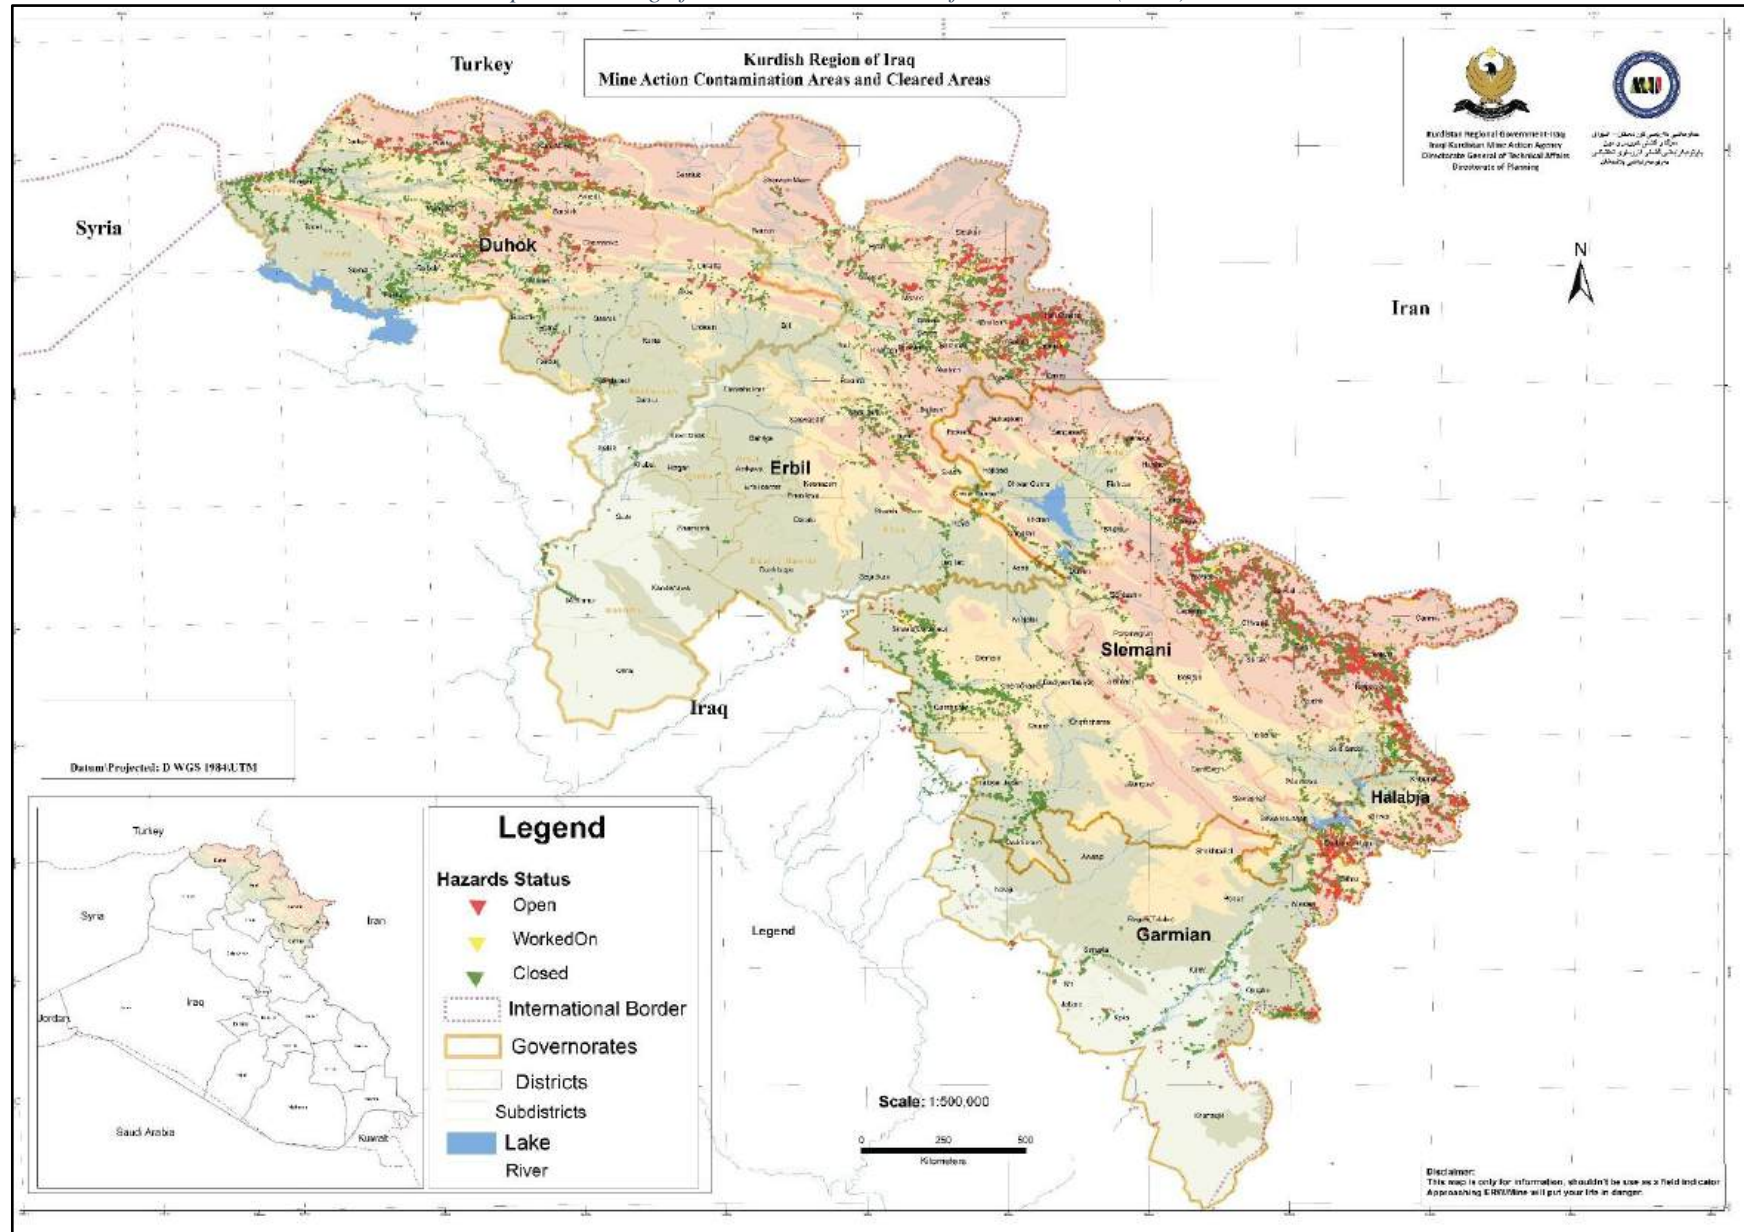

*Table 4- (IKMAA) Summary of Areas known or Suspected to Contain Anti-Personnel Mines as of 31 December (2024)*

Note: For more information, See Table 45- Annex (4) - List of Overall SHA containing AP and Table 46- Annex (5) - List of CHA containing Landmines, AP

Map 3- Locating of Hazard contain AP as of 31 December (2024)

## **C2-2 : Areas known(CHA) or Suspected(SHA) to contain Improvised mines (IEDs)**

### **- Action #20 - Siem Reap-Angkor Action Plan**

Iraq has reported that it applies the provisions and obligations of the Anti-Personnel Mine Ban Convention (APMBC) to anti-personnel mines of an improvised nature, including during survey and clearance operations in accordance with Article 5.

2020 Iraq has acknowledged that Improvised mines (IEDs) that meet the definition of anti-personnel mines fall under the scope of the Convention and has included them in its national survey and clearance efforts, as well as in its Article 7 transparency reports. This reflects Iraq's commitment to addressing all forms of anti-personnel mine contamination, regardless of whether the devices are manufactured or improvised.

### **C2-2-1: DIRECTORATE FOR MINE ACTION (DMA).**

As 31 December 2024, a total of 1,694 areas are known or suspected to contain Improvised mines ES (IEDs) within the jurisdiction of the DMA Authority, across 26 districts in six provinces of the Republic of Iraq. These include:

- 1,225 areas confirmed to contain Improvised (IEDs)s)) based on direct evidence, covering a total of 167,204,267 square meters, and
- 469 areas suspected to contain Improvised mines (IEDs) based on indirect evidence, covering 144,815,666 square meters.

This brings the total contaminated area to 312,019,933 square meters.

It is important to note that, despite ongoing clearance operations, the overall contaminated area has increased compared to the previous year. This rise is attributed to the discovery of new contaminated areas through ongoing non-technical surveys, as well as updates to previously conducted non-technical surveys.

Table (5) bellow Summaery of areas known or suspected to contain Improvised mines (IEDs) as 31 December (2024), for more information refer to Annex (3) for a complete list of these areas.

Table 5-(DMA) Summaery of areas known or suspected to contain Improvised mines (IEDs) as 31 December (2024)

Note : For More Information See table 44 - Annex (3) - List of areas known or suspected to contain IMPROVISED MINES (IEDs)as of 31 December (2024)

## C2-2-2 : Iraq Kurdistan Mine Action Authority (IKMAA)

The contaminated areas with IMPROVISED MINES (IEDs) found to be decreased comparing to the last year's transparency report. IKMAA has reviewed the information within the new database therefore, survey operations in the DAESH TERRORIST GROUPS liberated areas including areas under the responsibility of KRI and areas with IMPROVISED MINES (IEDs) have been updated. Therefore, the IMPROVISED MINES (IEDs) contamination turned out and to be **5,886,922** sqm.

Table 6- (IKMAA) Summary of areas known or suspected to contain Improvised mines (IEDs)

## **C2-3: MF area areas released and devices destroyed, 1 January-31 December (2024)**

### - Action #22 - Siem Reap-Angkor Action Plan

#### **C2-3-1: DIRECTORATE FOR MINE ACTION (DMA)**

In 2024, my country made significant progress in the field of humanitarian mine action, focusing on the release of mined area and the destruction of mines. The data provided illustrates the scope of operations carried out by the Regional Mine Action Centers (RMAC) in both the north (RMAC-N) and south (RMAC-S), across several provinces and districts.

#### **Land Released:**

A total of 13,555,341 square meters of land was released through a combination of area cancellation, reduction, and clearance. Among the most notable achievements:

- Amara District, Maysan Province recorded over 1.5 million square meters of cleared land—one of the highest in the country.
- Shatt Al-Arab, Basrah contributed significantly with over 7.4 million square meters reduced.
- Fao District, Basrah added another 1.7 million square meters released.

These efforts are critical in making land safe for agriculture, development, and the return of displaced populations.

#### **-Explosive Items Destroyed:**

In total, 5,093 anti-personnel mines and 3,563 other explosive devices were destroyed during the year.

#### **-Key areas of destruction included:**

Al-Zubair, Basrah, where 3,737 anti-personnel mines and 1,332 other explosive items were destroyed.

Amara, Maysan, with 957 mines and 1,376 explosive items destroyed.

Shatt Al-Arab, where 345 mines and 604 other items were destroyed.

These figures highlight both the intensity of contamination and the dedication of clearance teams operating under hard conditions.

**- Number of Areas Released:**

A total of 44 areas were declared free from explosive hazards. This is a meaningful step forward in Iraq’s broader goal of becoming mine-free, particularly in high-risk southern provinces such as Basrah and Maysan.

Some regions, such as Baiji District in Salah al-Din Province, saw limited activity, with only 13,921 square meters cleared and 2 explosive devices destroyed.

In Khanaqin, Diyala, although no land was officially cancelled, over 1.7 million square meters were reduced and cleared—that mean ongoing clear and technical survey.

**Table 9 below - Summary of minefield area released and devices Destroyed 1 January-31 December (2024)**

## **C2-4: IMPROVISED MINES (IEDs) area and areas released and devices destroyed, 1 January-31 December (2024)**

### **C2-4-1: DIRECTORATE FOR MINE ACTION (DMA)**

In 2024, the Directorate of Mine Action (DMA) conducted operations across multiple provinces in Iraq to clear areas contaminated by improvised mines (IEDs) and other explosive remnants of war (ERW). The table below provides a comprehensive summary of the efforts to clear improvised mines (IEDs) between 1 January and 31 December 2024.

#### **Total Areas Cleared and Released**

A total of 133,319,387 square meters of land were released through cancellation, reduction, and clearance processes. Of this, approximately 128,312,887 sqm were cancelled, meaning these areas were declared free of explosive hazards without physical clearance. Another 5,006,498 sqm were fully cleared.

#### **Devices and Explosives Destroyed**

During the operations, a total of 6,107 improvised mines (IEDs) were destroyed, alongside 2,500 other explosive items, such as unexploded ordnance and abandoned munitions. These efforts reduced the threat posed to local populations, enabling safer resettlement, agriculture, and development.

#### **Most Affected Regions**

- Khanaqin (Diyala) recorded the largest cancelled area, with over 122,758,838 sqm released without any explosives being found, highlighting the effectiveness of survey operations in identifying hazard-free land.
- Baiji (Salah al-Din) and Tilkaif (Ninewa) saw some of the highest numbers of improvised mines (IEDs) destroyed, with 2,135 and 1,275 devices respectively.

Mosul (Ninewa) stood out for the destruction of 1,765 other explosive items, making it one of the most heavily contaminated urban centers.

#### **Operational Highlights by Province**

- Anbar Province witnessed significant activity, particularly in Ana, Ramadi, and Rawa, where over 3.5 million sqm of land were released and nearly 2,000 improvised mines (IEDs) were destroyed.
- Ninewa Province continued to be a key focus, with clearance activities in Sinjar, Makhmur, and Telafar, where a high number of both improvised mines (IEDs) and other explosives were removed.
- Salah al-Din, especially Tikrit, recorded over 3,280,938 sqm of cancelled areas, even though no improvised mines (IEDs) were destroyed.

*Table 16 below - (DMA) Summary of Improvised mines (IEDs) Area and areas released and devices destroyed, 1 January-31 December (2024)*

## Action 1 - Siem Reap-Angkor Action Plan

Iraq has reported efforts to integrate Convention implementation activities into its national development plans, strategies, and budgets, as well as initiatives to strengthen partnerships and coordination across various sectors.

Iraq's National Development Plan (NDP) 2024–2028 emphasizes sustainable development, economic diversification, and social inclusion. The plan prioritizes investment in human capital, including education, health, and support for vulnerable groups such as persons with disabilities. It also addresses climate change adaptation and environmental sustainability, aligning with Iraq's Vision 2030.

### -Action # 3- Siem Reap-Angkor Action Plan

Iraq has reported before the development of evidence-based, costed, context-specific, and time-bound national strategies and work plans aligned with its obligations under various international conventions. These strategies also incorporate mechanisms for periodic review and updates based on new evidence

### -Action # 4- Siem Reap-Angkor Action Plan

26 national standards were updated with support from the United Nations Mine Action Service (UNMAS). The Directorate of Mine Action (DMA) participated in a workshop organized by UNMAS in Erbil, focused on updating these national standards.

The workshop was attended by representatives from the Iraqi Kurdistan Mine Action Agency (IKMAA) and the standards development team within DMA. Extensive discussions were held to review the latest technical and standardization updates, with the goal of incorporating them into the approved set of national standards. These updates provide precise technical support for both planning and operational activities on the ground.

Note: The updated standards can be downloaded from the DMA website:

<https://dma.gov.iq/ar-IQ//Attachments/ELibrary>

### -Action # 5- Siem Reap-Angkor Action Plan

Iraq has reported on how its national work plans and strategies integrate gender, age, and disability considerations. These elements are core to Iraq's humanitarian demining and victim assistance efforts, with national policies explicitly aiming to address the diverse needs and experiences of women, girls, boys, and men in mine-affected communities, including mine survivors. The Directorate of Mine Action (DMA) works closely with relevant ministries and civil society organizations to ensure that gender and diversity-sensitive approaches are embedded in planning and implementation.

The development of national strategies and work plans has involved inclusive consultation processes. These consultations have included survivors, local community leaders, women's groups, and organizations representing persons with disabilities. Through workshops, focus group discussions,

and community-level assessments, Iraq has gathered insights from diverse groups to inform policy and operational planning.

that survivor have been invited and supported to participate in Convention-related meetings. During recent years, Iraq facilitated the participation of national survivor in Convention meetings, where they contributed insights and shared experiences on victim assistance and inclusive programming.

## -Action # 9 - Siem Reap-Angkor Action Plan e (Informatio Management)

1- DMA reported having a strong, centrally managed information management system in place. The country is currently using IMSMAng as its primary platform.

DMA's system is regularly maintained and updated to reflect the status of implementation at the national level. Additionally, Iraq is receiving support from the Geneva International Centre for Humanitarian Demining (GICHD) to transition to IMSMA Core, which is designed to further enhance data accuracy, accessibility, and operational efficiency.

### 2- New IKMAA's Mine Action Information Management System

In the Kurdistan Region of Iraq (KRI), the Iraqi Kurdistan Mine Action Agency (IKMAA) has historically relied on an Information Management System to record, update, and store critical data related to mine action clearance operations. In recent years, IKMAA recognized the limitations of its existing system—IMSMAng version 6—and took a strategic step to transition towards a more advanced, self-developed, and fully customized Information System.

This transition was not merely an upgrade but a complete overhaul designed to accommodate the unique challenges of mine action in the KRI. Given the extensive experience of IKMAA in managing mine action programs—dating back to the early 2000s—the new system was built with a deep understanding of operational needs and long-term sustainability.

The database for this system was developed with technical support from the iMMAP organization and was generously financially backed by the PM/WRA fund. This initiative began in 2022 and reached completion on August 31, 2024. The primary motivation behind creating a local database was to establish a cost-effective yet powerful platform that eliminates dependency on expensive proprietary software. By leveraging open-source technologies, IKMAA ensured that the system would remain adaptable, scalable, and sustainable in the long run.

Built from the ground up, the new system was specifically designed to simplify and streamline information management throughout the mine action process. The technology stack is centered around PostgreSQL and PHP, complemented by various other free and open-source tools. This setup enabled the creation of a full-stack, centralized database system accessible online.

The implementation of the new system was not limited to IKMAA alone; it was designed to integrate seamlessly with other mine action implementers operating within the KRI. From the initial design phase, IKMAA prioritized collaboration, ensuring that multiple stakeholders could access and contribute to the system. The Geneva International Centre for Humanitarian Demining (GICHD) played a crucial role in the early planning and development stages, ensuring that the system adhered to international information management standards for mine action.

One of the most critical achievements of this project was the successful migration of over 25 years' worth of historical mine action data into the new system. This process involved meticulous accuracy checks and verification protocols to ensure data integrity. Additionally, the system incorporates Geographic Information System (GIS) capabilities to map hazardous areas and related data effectively. This integration ensures that mine action teams can rely on comprehensive, up-to-date geospatial information for reporting, planning, and executing clearance operations.

The new system officially went live in June 2024, and since then, it has demonstrated significant success in managing mine action operations across the KRI. By providing a centralized, robust, and efficient information management platform, IKMAA has significantly enhanced its capacity to oversee and coordinate mine clearance efforts. The new system not only ensures better data accuracy but also facilitates more effective reporting and decision-making processes, ultimately contributing to the safety and efficiency of mine action programs in the region

## -Action 2 - Siem Reap-Angkor Action Plan

Iraq has reported that it has in place a sustainable national capacity to coordinate, regulate, and manage its mine action programme. The Directorate of Mine Action (DMA) the national authority, and Iraq has developed national mine action standards (NMAS), a legal framework, and coordination mechanisms covering survey, clearance, mine risk education (MRE), and victim assistance.

Additionally, Iraq has reported its capacity to undertake post-clearance activities, including mechanisms to address newly discovered or re-contaminated areas, thus ensuring continued compliance and response capabilities.

### 1- (DMAs progress in developing national capacity)

In 2024, the Directorate of Mine Action (DMA), in coordination and cooperation with all partners both governmental and non-governmental established a flexible annual training plan. The purpose of this plan is to enhance the capabilities of supervision and implementation teams from governmental and non-governmental organizations and companies, both national and international, as well as within the DMA itself.

The plan includes a range of internal training courses designed to build technical and operational capacities. Details of these training activities can be found in Tables 18 and 19 below.

*Table 18- DMAs progress in developing of national governmental capacity 1 January-31 December (2024)*

## D- APMs retained or transferred

### -Action #16 - Siem Reap-Angkor Action Plan

According to Article 3

No Change .

#### **- Iraq's Efforts in Implementing Article 3 of the Anti-Personnel Mine Ban Convention**

Iraq continues to demonstrate its strong commitment to the implementation of the Anti-Personnel Mine Ban Convention (commonly known as the Ottawa Treaty), which is a cornerstone of international humanitarian law. Article 3 of the Convention allows for the retention or transfer of a limited number of anti-personnel mines for the development of and training in mine detection, mine clearance, and mine destruction techniques.

In alignment with this provision, Iraq has recently intensified its efforts to implement Article 3 in a responsible and transparent manner. Key government bodies, particularly the Ministry of Defense and the Ministry of Interior, have held coordination meetings with national mine action authorities to ensure compliance with the Convention while building national capacity for mine clearance operations.

One of the most significant outcomes of these meetings was the agreement to replace live explosive devices with inert (non-live) models in training programs for demining and explosive ordnance disposal (EOD) teams. This shift marks a major step forward in terms of safety, compliance, and technical advancement.

The decision to use inert models aims to achieve several key objectives:

- Legal Compliance: Ensuring all training activities are consistent with Article 3 of the Convention, which restricts the use of live mines to very limited and specific purposes.
- Capacity Building: Enhancing the skills of Iraqi deminers through realistic, yet safe, training environments.
- Risk Reduction: Minimizing the dangers associated with handling live explosives during training exercises.
- Technological Advancement: Introducing advanced training tools and scenarios that simulate real-world conditions without the associated risks.

Government representatives affirmed their full support for this approach and expressed readiness to provide the necessary logistical and technical resources to implement the use of inert models across all relevant training facilities.

Furthermore, Directorate of mine Action (DMA) has called upon the international community to support Iraq's ongoing efforts, through technical assistance, provision of modern training aids, and capacity development for demining personnel.

this initiative reflects Iraq's dedication to creating a mine-free environment, protecting civilian lives, and reinforcing its role as a responsible party to international humanitarian agreements. in the near future will anawnce Iraq Compliant of artical 3

## I - Warning measures

### **I-1 : Risk Educations (EORE) campaign.**

#### **I-1-1: DIRECTORATE FOR MINE ACTION AUTHORITY (DMA)**

##### -Action # (26)- Siem Reap-Angkor Action Plan

we reported before integrating Mine Risk Education (EORE) and risk reduction programmes within wider national plans and across various mine action pillars, including survey, clearance, and victim assistance activities.

Iraq has made efforts to:

- Incorporate EORE into national mine action strategies, aligning them with broader humanitarian and development goals.
- Mainstream EORE activities into survey and clearance operations, ensuring that affected communities are informed about risks both before and after clearance.
- Coordinate EORE with victim assistance programmes, especially in areas where survivors and at-risk populations require ongoing support and awareness efforts.
- Work through the Directorate of Mine Action (DMA) and the Iraqi Kurdistan Mine Action Agency (IKMAA) to ensure that risk education is systematically included in operational planning.

Iraq has also partnered with international organizations like the UN Mine Action Service (UNMAS) and NGOs to deliver these integrated activities, particularly in areas liberated from DAESH terrorist groups where contamination remains high.

##### -Action # 27 – Siem Reap-Angkor Action Plan

in 2024, Iraq reported the establishment of an evidence-based priority-setting mechanism for mine risk education (MRE) and reduction programs tailored to the specific threats faced by its population. This initiative is a key component of the National Mine Action Strategy for 2023–2028, which was officially approved and launched by the Directorate for Mine Action (DMA) .

The strategy emphasizes the use of casualty and contamination data to inform the prioritization of MRE and clearance activities. It focuses on areas with high levels of explosive ordnance contamination, particularly those affecting agricultural lands, infrastructure, roads, and water resources . this data-driven approach ensures that resources are allocated to regions where the risk to civilians is greatest. this activites It incorporates considerations of gender, age, and disability to ensure that MRE programs are inclusive and effective. Also accounts for anticipated population movements, particularly the return of displaced persons to previously contaminated areas. By aligning EORE and clearance efforts with reconstruction and resettlement plans, as well as aims to facilitate safe and sustainable returns .

That mean represents a comprehensive, evidence-based approach to mine risk education and reduction, prioritizing those most at risk and tailoring interventions to the specific threats encountered by different segments of the population.

### -Action # 28– Siem Reap-Angkor Action Plan

in 2024, we made progress toward establishing sustainable national capacities to deliver mine risk education and reduction programmes, including mechanisms to adapt to newly discovered or previously unknown mined areas and emergency settings.

the United Nations Mine Action Service (UNMAS) supported Iraq's efforts by providing technical and advisory assistance to national authorities, enhancing the capacity of national mine action organizations, and conducting explosive hazard management activities.

DMA by cooperating with IPs made alot trainning for many people that working in in defrient fields such as constraction or educations but thay working in dangerous environment in order to increase awarness and change behaivor.

These efforts contribute to increase Iraq's capacity to adapt to changing needs and contexts spically in EORE.

## -Action # 29 – Siem Reap-Angkor Action Plan

### I-1-1-A : Risk Educations (EORE) campaign (Gender and Age Group) by District

In 2024, Iraq's mine action programs significantly expanded their Explosive Ordnance Risk Education (EORE) activities, as documented in Article 7 of the national report. These efforts aimed to raise awareness and reduce risks associated with explosive hazards, particularly Improvised Explosive Devices (IEDs), across affected communities.

The EORE campaigns were designed with a context-specific approach to ensure the delivery of relevant, accurate, and life-saving information to populations at risk. These educational initiatives were carefully tailored to reflect the types of threats encountered by the local population. By customizing messages to the actual conditions on the ground, the programs increased their effectiveness in helping communities avoid danger.

Iraq's EORE strategy emphasized inclusivity and diversity. Special consideration was given to gender, age, and disability, ensuring that messages were accessible and understandable to everyone, including children, youth, women, the elderly, and persons with disabilities. The programs also benefited from the valuable insights and experiences shared by residents of affected communities. This participatory approach strengthened the relevance and impact of risk education messages.

### **EORE Beneficiaries in 2024**

The scope of Iraq's EORE outreach in 2024 is evident in the number of beneficiaries reached across different demographic groups. A total of **282,779 individuals** benefited from these educational activities. The breakdown is as follows in table (30):

*Table 29-(DMA) summary of EORE Per Gender and Age Group by District (1 January-31 December 2024)*

<b>Age Group</b>	<b>Male Beneficiaries</b>	<b>Female Beneficiaries</b>
<b>Children (5–12)</b>	72,444	72,736
<b>Youth (13–18)</b>	35,869	29,366
<b>Adults (19+)</b>	36,141	36,223
<b>Total</b>	<b>144,454</b>	<b>138,325</b>

This data highlights a balanced and inclusive outreach, particularly among children aged 5–12, who represented the largest share of beneficiaries. This focus reflects the vulnerability of younger populations and the need to equip them with knowledge to avoid explosive hazards. Similarly, adults were reached in significant numbers, reinforcing community-wide awareness and supporting protective behaviors across generations.

Iraq's commitment to EORE in 2024 demonstrates a proactive and inclusive approach to managing the risks posed by explosive remnants of war. Through targeted messaging, community involvement, and a strong emphasis on reaching all age and gender groups, Iraq continues to make strides toward a safer future for all its citizens.

*Table 30- (DMA) Summary of EORE Beneficiaries Per age (1 January-31 December 2024)*

<b>Beneficiaries</b>	<b>Children 5-12 Male</b>	<b>Children 5-12 Female</b>	<b>Youth 13-18 Male</b>	<b>Youth 13-18 Female</b>	<b>Adult 19+ Male</b>	<b>Adult 19+ Female</b>	<b>No. of Beneficiaries</b>
<b>Total</b>	<b>72,444</b>	<b>72,736</b>	<b>35,869</b>	<b>29,366</b>	<b>36,141</b>	<b>36,223</b>	<b>282,779</b>

### I-1-1-B: Risk Education By Distributed Materials

Mine awareness organizations operating in Iraq conduct Explosive Ordnance Risk Education (EORE) campaigns in areas assigned by the Directorate of Mine Action (DMA). These organizations are accredited by the DMA to carry out EORE activities. Additionally, all distributed materials used in these campaigns have been reviewed and approved by the EORE and Media Department within the DMA. Further details on the materials distributed are provided in Table 33 below.

*Table 33-(DMA) Summary of EORE By Distributed Materials by District-2024*

## I-1-2: Iraq Kurdistan Mine Action Authority (IKMAA)

At 2024, the number of EO victims reduced with respect to previous year, but still a lot are and needed further attention. IKMAA trained Community Safety Wardens (CSW) to deliver lifesaving messages and instructions to the people of their villages and areas. In fact, these CSWs were able to warn the people of their villagers and fortunately, this move has had a great positive impact on the villagers of their area so that no more accidents were recorded, thus the victim for this year is reduced. On the other hand, IKMAA through its website & Facebook page, social media and media channels disseminated EORE messages and instructions in order to provide its warning messages to the social media users.

## **I-2: Marking**

### **I-2-1: DIRECTORATE FOR MINE ACTION AUTHORITY (DMA)**

In 2024, the Iraqi Directorate for Mine Action (DMA) intensified its efforts to mark and secure hazardous minefields across the country, aligning with the national mine action strategy for 2023–2028. This strategy aims to clear Iraq of landmines and explosive remnants of war (ERW) by 2028, in accordance with international treaties such as the Anti-Personnel Mine Ban Convention

### **I-2-2: The Iraqi Kurdistan Mine Action Agency (IKMAA)**

In 2024, Iraq made significant progress in marking and managing dangerous minefields, a crucial step toward ensuring public safety and advancing national development. The Iraqi Kurdistan Mine Action Agency (IKMAA) led efforts to re-demarcate tens of thousands of meters of hazardous land with red triangle warning signs, especially in areas where original markers had deteriorated due to weather conditions. This initiative aimed to protect civilians and tourists, particularly in regions popular for hiking and picnicking, where landmines continue to pose a deadly threat .

## J- Other Relevant Matters:

### **J-1: Victim Assistance**

#### J-1-1: DIRECTORATE FOR MINE ACTION (DMA)

This table (39) bellow provides a breakdown of the number of individuals injured and killed in various provinces. The data is categorized by gender and age group (male, female, and child).

Grand Totals:

Injured: 20 (11 males, 9 children)

Killed: 13 (8 males, 5 children)

No female injuries or deaths were reported across the provinces.

Table 39- (DMA) Number of individuals killed or injured by anti-personnel mines, 1 January – 31 December 2024.

ت	Province	Injered				Killed			
		male	Female	child	total	male	Female	child	Total

8	Paying the salaries of a helper of the full-time victim	2113	2593

## [The Victim Assistance Requirements according to the Siem Reap-Angkor Action Plan of Ottawa Convention](#)

### [-Action # 30 - Siem Reap-Angkor Action Plan](#)

Here's a clearer and more polished version of your text that maintains the original meaning while improving flow and grammar:

As mentioned in our previous article on the seven reports, there is a government entity established under Law No. (38) of 2013: the *Authority for the Care of People with Disabilities and Special Needs*. This Authority operates under the Ministry of Labor and Social Affairs (MOLSA) and is responsible for setting the general policies concerning people with disabilities and special needs in Iraq.

The Board of Directors of the Authority is composed of the following members:

1. The Chairman of the Authority
2. Two Vice-Chairpersons of the Authority
3. A representative from the General Secretariat of the Council of Ministers
4. Representatives from the following ministries and entities:
  - Ministry of Finance
  - Ministry of Defense
  - Ministry of Commerce
  - Ministry of Justice
  - Ministry of Interior

- Ministry of Labor and Social Affairs
- Ministry of Education
- Ministry of Health
- Ministry of Housing and Construction
- Ministry of Higher Education and Scientific Research
- Ministry of Planning
- Ministry of Youth and Sports
- Human Rights Commission
- Kurdistan Regional Government
- Seven members representing individuals with disabilities and special needs
- Two physicians specializing in disability-related care

**The Board of Directors of this Authority undertakes the following responsibilities:**

1. **Policy Making:** Establishing and approving the general policy for the Authority’s work in caring for people with disabilities and special needs, including their rehabilitation and the follow-up of implementation procedures.
2. **Oversight and Coordination:** Supervising and monitoring the provision of necessary services and requirements for people with disabilities and special needs across all sectors, in coordination with the relevant competent authorities.
3. **Employment Policy:** Proposing employment policies for people with disabilities and special needs by developing specialized programs and identifying suitable job roles for them.
4. **Training and Research:** Developing plans for training and conducting research relevant to disability care and support.
5. **National Awareness:** Promoting comprehensive national awareness to prevent the occurrence of disabilities, mitigate their severity, and avoid their exacerbation.
6. **Reporting:** Submitting semi-annual reports to the Council of Ministers detailing the Authority’s activities and progress.
7. **Implementation Monitoring:** Overseeing and ensuring the execution of decisions made by the Board of Directors.

[-Action # 31- Siem Reap-Angkor Action Plan](#)

As previously reported, efforts have been undertaken by the Iraqi government through The Authority for the Care of People with Disabilities and Special Needs, to implement the provisions and articles of Law No. (38) of 2013. This law is designed to achieve several key objectives:

1. Providing care for people with disabilities and special needs, and eliminating discrimination based on disability.
2. Establishing the necessary requirements for integrating individuals with disabilities into society.
3. Ensuring a dignified and fulfilling life for people with disabilities and special needs.

4. Promoting respect for disabilities and recognizing them as part of human diversity and nature.
5. Creating employment opportunities for people with disabilities across state institutions, as well as in the public, mixed, and private sectors.

The law provides a comprehensive legal framework covering rights related to health, education, employment, and other areas. These rights are aligned with the relevant provisions of the Convention on the Rights of Persons with Disabilities, ensuring full inclusion and protection for individuals with disabilities and special needs.

#### -Action # 32 - Siem Reap-Angkor Action Plan

The Directorate of Mine Action (DMA) in Iraq has previously reported that it maintains a robust database within the IMSMA system, which contains information about victims (both killed and injured) due to mines and explosive ordnance (EO). This data is collected through field surveys and follow-up on emergency injuries, depending on various sources.

Currently, the DMA is working to unify the existing database with all relevant authorities. To achieve this, several meetings have been held with partners and ministries involved in providing related services. These meetings took place at the headquarters of the National Data Center Department.

During the discussions, it was decided that the Ministries of Planning, Health, Defense (MOD), and Interior (MOI) will provide the National Data Center Department with relevant data. This data will be submitted electronically and categorized according to the classifications defined by the Ministry of Labor and Social Affairs (MOLSA) / Authority for the Care of People with Disabilities and Special Needs.

#### -Action # 33 - Siem Reap-Angkor Action Plan

Iraq reported the First aid is provided effectively and efficiently to victims by all emergency wards in government hospitals near the affected communities. In addition, continuous medical care is offered by medical rehabilitation hospitals, rehabilitation centers, and prosthetic limb manufacturing centers. Support is also provided to victims after their full recovery, ensuring they receive the necessary medical aid based on their individual conditions.

#### -Action # 34 - Siem Reap-Angkor Action Plan

Iraq reported the Guide to Emergency Medical Services for Victims of Mines and War Remnants. This service guide was prepared and printed through the joint efforts of the DMA and the Ministry of Health /Department of Operations and Emergency Medical Services/Department of Rehabilitation and Disability Prevention. It was developed for the benefit of all individuals with disabilities resulting from mines and war remnants. Additionally, it was created in collaboration with our department and with the support of the International Organization for Disability (HI) to ensure that all victims have access to the necessary services.

The guide serves as a comprehensive reference for mine and war remnants victims, offering direction on how to access medical and rehabilitation services. It was drafted by the Ministry of Health/Department of Rehabilitation and Disability Prevention to provide clear referral pathways for

injured individuals—once they have achieved full medical recovery—to rehabilitation centers, prosthetic limb centers, or any other required services.

The guide also highlights training centers affiliated with the Ministry of Labor and Social Affairs, ensuring that victims, after full recovery, can access vocational training and be reintegrated into the workforce.

### -Action # 35- Siem Reap-Angkor Action Plan

Ministry of Health, through the Directorate of Operations and Emergency Medical Services and the Department of Rehabilitation and Prevention of Disability, has taken serious steps toward activating the role of community rehabilitation. This initiative aims to ensure the delivery of comprehensive services to victims in remote and underserved areas, meeting their medical and rehabilitation needs effectively.

To support this initiative, a joint committee has been formed under the Directorate, comprising representatives from Public Health, a physical therapist, a prosthetic limb technician, and a representative from the Disability Care Authority.

The first phase of the program was launched in Baghdad Governorate, covering both the Karkh and Rusafa districts. As part of this phase, a rehabilitation center on the Rusafa side was selected-based on the allocated financial budget-to spearhead the effort. This center has taken on the responsibility of delivering essential rehabilitation services directly to victims through organized field visits to their homes.

This effort underscores the Ministry's commitment to inclusivity and its proactive approach to reaching all citizens with vital healthcare services, particularly those living in isolated areas.

### -Action # 36 - Siem Reap-Angkor Action Plan

Iraq has taken steps toward ensuring that mine and explosive ordnance victims especially those in rural and remote areas have access to rehabilitation services . However, challenges remain due to security issues, funding gaps, and infrastructure limitations. Here's a summary of key actions Iraq has taken, particularly in the context of its obligations under international frameworks like the Anti-Personnel Mine Ban Convention (APMBC) and the Convention on the Rights of Persons with Disabilities (CRPD):

Key Steps Iraq Has Taken:

#### **National Policies and Strategies:**

- Iraq has developed a National Victim Assistance Strategy, often aligned with broader disability rights frameworks, which includes access to healthcare, physical rehabilitation, and socio-economic inclusion.
- The Directorate for Mine Action (DMA) under the Ministry of Environment plays a lead role in coordinating mine action efforts, including victim assistance.

### **Rehabilitation Centers and Services:**

- Iraq has rehabilitation centers in several governorates that provide services like prosthetics, physiotherapy, and psychological support.
- Some centers work in partnership with international NGOs and agencies such as the ICRC (International Committee of the Red Cross), Humanity & Inclusion (HI).

### **Outreach and Mobile Services:**

- Iraq has initiated mobile and outreach programs to reach victims in rural and remote areas. These are often supported by international partners and focus on delivering assistive devices, physical therapy, and follow-up care.
- Efforts have been made to strengthen community-based rehabilitation support networks.

### **Data Collection :**

- Iraq works to improve data collection on victims, including gender- and age-disaggregated data, to better identify needs and deliver targeted services.
- Victim mapping and needs assessments are also conducted, with particular attention to marginalized groups such as children, women, and internally displaced persons (IDPs).

### **Challenges and Gaps:**

- access issues in some areas still hinder the consistent delivery of services.
- There is a shortage of trained personnel in rehabilitation and psychological support fields.
- Many victims still face barriers in accessing services due to economic hardship, distance, or lack of information.

### [-Action # 37- Siem Reap-Angkor Action Plan](#)

Iraq has reported on several initiatives related to mental health and psychosocial support (MHPSS) for mine and other explosive ordnance victims. Here's an points :

#### **1. Access to Psychosocial and Mental Health Services**

Iraq has undertaken efforts to integrate mental health services into primary healthcare. there is some challenges such as deficiencies in staff training, shortages of psychotropic medications, and inadequate referral systems. Recommendations were made to improve service delivery and address mental health care gaps, including strengthening staff capacity and integrating mental health services into public health policies.

#### **2. Efforts to Increase National Capacity**

Iraq has made efforts to enhance national capacity in mental health services. The Ministry of Health initiated a program to integrate mental health into primary care, which included training healthcare staff, improving access to care, and enhancing collaboration between primary and specialized services. This program aimed to increase the availability and quality of mental health services across the country.

### -Action # 38 - Siem Reap-Angkor Action Plan

Iraq has reported significant efforts to ensure that national humanitarian response and preparedness plans incorporate the needs of mine victims, aiming to safeguard their safety and protection in situations of risk, including armed conflict, humanitarian emergencies, and natural disasters. □

Iraq's National Mine Action Strategy 2023–2028 emphasizes victim assistance as a core pillar. The strategy aims to provide gender- and diversity-sensitive, rights-based services and opportunities accessible to all explosive ordnance (EO) victims equally. It aligns with Iraq's commitments under international conventions such as the Anti-Personnel Mine Ban Convention (APMBC), the Convention on the Rights of Persons with Disabilities (CRPD).

Iraq faces challenges in ensuring the safety and protection of mine survivors, including extensive EO contamination affecting agricultural areas, infrastructure, roads, and water resources. To address these challenges, the DMA has prioritized victim assistance, through the partners providing medical, economic, social, and rehabilitative services to facilitate survivors' reintegration into society.

Iraq actively involves mine victims and their representative organizations in humanitarian assistance, risk reduction. The DMA collaborates with national and international partners, including the Ministry of Labor and Social Affairs, the Ministry of Health, civil society organizations, and international NGOs, to develop and implement strategies that address the needs of mine victims.

These concerted efforts demonstrate Iraq's commitment to integrating mine victims' needs into national humanitarian response and preparedness plans, addressing challenges in their safety and protection, and ensuring their inclusion in relevant programs.

## -Action # 39 - Siem Reap-Angkor Action Plan

Iraq has reported on multiple initiatives aimed at improving access to services, establishing national policies for accessibility, and ensuring the inclusion of mine victims and their representative organizations in relevant matters. Here's an overview:

Iraq has undertaken significant steps to enhance access to services for mine victims and persons with disabilities:

- National Mine Action Strategy (2023–2028): This strategy emphasizes victim assistance as a core objective, aiming to provide gender- and diversity-sensitive, rights-based services and opportunities accessible to all explosive ordnance victims on an equal basis.
- National Standard for Victim Assistance (NMAS 13:10): Iraq launched NMAS 13:10, becoming the first country to develop a national standard compatible with International Mine Action Standards (IMAS) for victim assistance. This standard focuses on delivering comprehensive medical, economic, social, and rehabilitative services to ensure the reintegration of victims into society.
- The Iraqi government has implemented national policies to ensure accessibility:
- First National Forum for Empowering People with Disabilities: Held in July 2024, this forum, under the patronage of the Prime Minister, brought together stakeholders from various sectors to discuss challenges faced by individuals with disabilities and explore ways to enhance their vocational rehabilitation and economic empowerment.
- Iraq has established mechanisms to ensure the inclusion and effective participation of mine victims and their representative organizations:
- Workshops and Consultations: The DMA, in collaboration with Handicap International and other partners, has conducted workshops to develop action plans for implementing victim assistance standards, incorporating feedback from survivors and their organizations.
- Engagement with Representative Organizations: The Iraqi organizations have been actively involved in discussions and planning processes, ensuring that the voices of persons with disabilities are heard and considered in decision-making.
- Inclusion of Mine Survivors in Victim Assistance Planning

Mine survivors and their representative organizations have been included in victim assistance planning at both national and local levels:

- Procedural Plans for NMAS 13:10: The development of procedural plans for implementing NMAS 13:10 involved consultations with survivors and their organizations to ensure that the standards meet their needs and priorities.
- National Forums and Workshops: Events like the First National Forum for Empowering People with Disabilities have provided platforms for survivors to share their experiences and contribute to policy discussions.
- These initiatives demonstrate Iraq's commitment to improving accessibility, ensuring the inclusion of mine victims and persons with disabilities, and aligning with international standards and obligations.

## J-1-2: Iraq Kurdistan Mine Action Authority (IKMAA)

The shortages in the financial support continued in 2024, IKMAA EORE team activities to warn communities were reduced and limited. Unfortunately, teams were unable to adequately visit villages and communities polluted with EO, and this was the main cause behind keeping the accidents at the indicated level. Fortunately, In 2024 the number of victims reduced to 11 as shown the following table, all of them are male and most of whom were shepherds, herb collectors.

Despite the EO accidents in the Kurdistan Region, especially in the areas where highly contaminated, the Prosthetic and Rehabilitation Centers which are assigned for providing services to the victims, they don't have the necessary equipment to provide services to the victims, in result, EO victims in Erbil and Duhok are obliged to visit the ICRC center in Erbil, this lay a high financial cost on the victims.

*Table 42- (IKMAA) No. of Victims per District 2024*

## **J-2 Cooperation and Assistance**

In 2024 as a result of cooperation between DMA and international society, Republic of southern Korea Grant to the Directorate of Mine Action Includes Three Advanced Detectors

In a significant step towards enhancing humanitarian demining efforts, the Republic of Korea has provided a generous grant to the Directorate of Mine Action. This vital support includes the donation of three modern and highly advanced mine detectors, aiming to strengthen the Directorate's capacity to clear landmines and explosive remnants of war more efficiently and safely.

The newly donated devices are equipped with cutting-edge technology, offering higher accuracy, deeper detection capabilities, and improved reliability in various terrains. These detectors are expected to greatly aid demining teams by increasing the speed and precision of their operations, ultimately reducing risks and saving more lives.

The Korean government's contribution reflects a continued commitment to international peace and stability, as well as strong bilateral cooperation. This initiative not only supports the clearance of dangerous areas but also contributes to restoring safe access to land for agriculture, infrastructure development, and the return of displaced communities.

DMA their highlighting its importance in their ongoing mission to make affected regions free from the threat of landmines. They also emphasized that such international partnerships are crucial for the long-term success of humanitarian mine action in the country.

This generous grant marks another milestone in the collaborative efforts between Korea and the Iraqi authorities in promoting peace, security, and development through mine action.

### - Action # 40- Siem Reap-Angkor Action Plan

Iraq reaffirmed its strong commitment to the Anti-Personnel Mine Ban Convention . This commitment reflects Iraq's dedication to protecting civilians, rebuilding war-torn areas, and promoting peace and security within its borders and beyond. A key component of Iraq's approach in 2024 has been its active engagement in international cooperation and assistance, both as a recipient and as a partner in the global demining effort.

Recognizing that the threat of landmines extends beyond borders, Iraq has prioritized strong partnerships with international organizations, donor countries, and NGOs. In 2024, Iraq worked closely with the United Nations Mine Action Service (UNMAS), the International Committee of the Red Cross (ICRC), and several regional actors to accelerate mine clearance operations and expand victim assistance programs.

Iraq also participated in international forums and conferences, contributing to the exchange of knowledge and best practices in mine action. By sharing its experiences and challenges, Iraq has helped shape the global response to landmine contamination, especially in post-conflict zones.

Iraq continues to receive technical and financial support from several countries and humanitarian organizations. This assistance includes advanced demining equipment, specialized training for Iraqi personnel, and funding for rehabilitation centers that serve mine victims. In 2024, donor nations played a vital role in supporting Iraq's national demining program.

At the same time, Iraq has begun exploring ways to offer assistance to neighboring countries and regions facing similar challenges. Iraqi demining experts have participated in regional workshops and

have shared expertise in handling improvised explosive devices (IEDs) and legacy mines from past conflicts.

otherways Iraqi government focus of efforts is supporting landmine survivors. The country has expanded medical care, psychological support, and socio-economic reintegration programs for victims. In collaboration with international partners, Iraq is working to ensure that all survivors receive the help they need to lead dignified and productive lives.

Iraq's renewed dedication marks a significant step toward a mine-free future. By deepening international cooperation and strengthening mutual assistance, Iraq not only accelerates its own progress under the Mine Ban Treaty but also contributes to global peace and humanitarian efforts. The road ahead is still long, but with persistent international engagement, Iraq aims to meet its obligations under the Convention and safeguard its citizens for generations to come.

### - Action # 41- Siem Reap-Angkor Action Plan

Iraq has reported on the challenges it faces and its requirements for assistance, as well as on its resource mobilisation efforts, though the level of detail and consistency can vary depending on the reporting period and document.

#### **1. Reporting on Challenges and Requirements for Assistance**

Iraq has provided information on the challenges it faces and its assistance needs in several forums, including:

- Article 7 Reports: These typically include details on contamination, clearance progress, national capacities, and challenges (security conditions, technical limitations, and funding gaps).
- a- Article 5 Extension Requests: Iraq submitted an extension request under Article 5, which outlines:
  - b- The extent of contamination.
  - c- The challenges in meeting the original deadline.
  - d- A revised clearance plan with assistance requirements.
  - e- Updated Work Plans: These have been used to show changes in operational priorities or needs and to align efforts with evolving challenges, especially regarding newly contaminated areas due to conflict with DAESH terrorist groups .

#### **2. Resource Mobilisation Plan**

Iraq has referred to resource mobilisation efforts, though not always in the form of a comprehensive, standalone plan. These efforts are often reported as:

- Partnerships with international donors and organisations .
- Bilateral cooperation initiatives.
- Appeals for funding in Article 5 extension requests and other reports.

### **3. Use of the Individualised Approach Tool**

Iraq has participated in Individualised Approach meetings, which are designed to give affected States the opportunity to present their challenges and needs directly to potential donors and partners. This platform allows for more tailored and transparent communication on priorities and resource gaps.

#### - Action # 42- Siem Reap-Angkor Action Plan

##### **Enhancing Coordination Among Mine Action Stakeholders Through the National Forum**

The threat of landmines and explosive remnants of war (ERW) continues to pose significant challenges to safety, development, and stability in many post-conflict regions. Effective and coordinated mine action is crucial to addressing these challenges, and this requires the collaboration of a wide range of national and international actors. Recognizing the urgent need to streamline efforts and improve coordination, the Directorate of Mine Action Affairs has launched a new initiative the National Forum.

The National Forum represents a pivotal step toward adopting a unified and individualized approach to mine action. This platform was established with the primary goal of enhancing collaboration among all stakeholders involved in mine clearance, risk education, victim assistance, and advocacy. By providing a central mechanism for information sharing and joint planning, the platform helps avoid duplication of efforts, ensures transparency, and improves the overall effectiveness of operations.

National and international partners, including government agencies, UN bodies, NGOs, are now able to coordinate their activities through National Forum in a more structured and efficient manner. The platform facilitates regular meetings, data exchange, and strategic alignment, allowing stakeholders to contribute to a collective mission with shared priorities and a common vision.

One of the core strengths of National Forum is its focus on a Individual approach tailoring solutions based on the specific needs of affected communities and operational environments. This individual-centric perspective allows for better-targeted interventions, improved resource allocation, and more sustainable outcomes for mine-affected populations.

By bridging gaps between actors and fostering a culture of partnership, the National Forum is laying the foundation for a safer and mine-free future. The Directorate of Mine Action Affairs' leadership in launching and sustaining this platform demonstrates a strong commitment to innovation, inclusiveness, and long-term impact.

In conclusion, the establishment of National Forum is a landmark achievement in the field of mine action. It not only promotes stronger cooperation among stakeholders but also ensures that efforts are guided by a unified strategy that places affected individuals and communities at the heart of all operations.

### IKMAA's Activities in 2024:

In 08-May 2024, a Memorandum of Understanding (MoU) on cooperation in Mine Action was signed between both Directorate of Mine Action (DMA) and Iraqi Kurdistan Mine Action Agency (IKMAA) in Baghdad to support the activities of the Clearance ops and Explosive Ordnance Risk Education and EO victim assistance in Iraq.

In 2024 Kurdistan Regional Government (KRG) has decided to open an additional Mine Action Center in the level of Directorate General of mine action and as part of IKMAA structure in the Governorate of Halabja, the decision is made as the interest of the KRG in MA in the region and the heavy areas of contaminated with EO in order to accelerate MA operations and activities in this province.
